Specialised Doors
 Standard and Non Standard

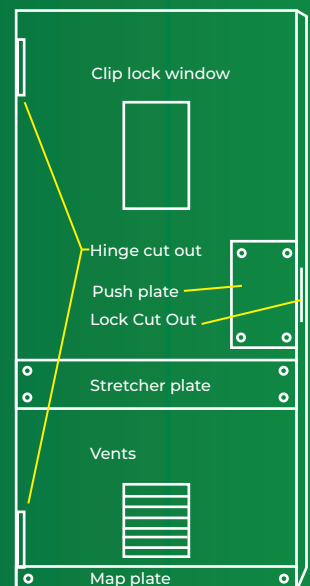

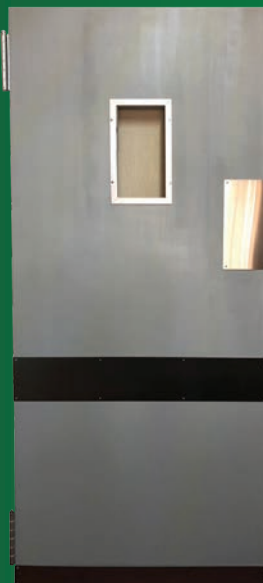

We manufacture custom made doors which are used in hospitals, clinics, schools or any other development.

Our Hospital Doors

Hospital and clinic doors are designed with various features to cater to the specific needs of medical environments. They typically include a clip lock window, allowing staff to observe patients without compromising privacy. A push plate facilitates easy entry and exit, while a stretcher plate ensures smooth passage of stretchers. The doors also have a map plate for directional guidance. To enhance hygiene, these doors are coated with antimicrobial and bacterial water-based enamel. Vents are incorporated to maintain adequate airflow and prevent the buildup of stale air. Additionally, lock cutouts are provided for secure access control.

Our School Doors

The school doors adhere to strict government specifications, ensuring the safety and security of students and staff. These doors are meticulously crafted by using locally grown saligm, a durable and sustainable wood known for its strength and resilience. The front of the doors serve as the welcoming gateway to the room, designed with aesthetics in mind and a natural finish, creating a neat first impression. Meanwhile, the back of the door provides strength and durability. With their sturdy construction and aesthetic appeal, these school doors contribute to a conducive learning environment while prioritising safety and functionality.

Our Bespoke Custom Doors

Non-standard doors offer a customisable solution for unique spaces or specific design requirements. These doors can be crafted from solid timber or hollow core materials, and their sizes can be tailored to fit within the parameters of 1.2 x 2.4 meters. The flexibility in size ensures a perfect fit for non-standard openings, such as unusually large or small doorways. Whether it's a grand entrance or a compact utility room, non-standard doors provide the freedom to create a bespoke solution that complements the overall aesthetics and functionality of the space. With their customisability, these doors offer a personalised touch to any environment.

Our Barn Doors

Barn doors, steeped in rustic charm, evoke a sense of nostalgia and bring a touch of countryside allure to any space. Crafted from sturdy materials such as reclaimed wood or metal, these doors serve as functional and decorative elements. Their sliding mechanism adds a unique flair, allowing them to effortlessly glide open or closed, conserving space and providing a seamless transition. Whether adorning a traditional barn or incorporated into contemporary interior design, barn doors offer versatility and character. Their weathered textures, natural finishes, and distinctive hardware showcase a timeless appeal that captures the essence of rural aesthetics, creating an inviting and cozy atmosphere.
